DETAILED ACTION

Allowable Subject Matter

1. Applicant's amendment filed on 12/19/05 have been fully considered and are persuasive.

2. The following is an examiner's statement of reasons for allowance:

As per independent claim 1, Applicant's claimed invention is deemed allowable over the prior art of record as the prior arts, alone or combination, fail to teach or suggest a bus interface arranged to handle the protocol, sending data items from the buffer in the messages, the bus interface determining to send an interrupt to the processor in response to selected ones of the requests, as a function of whether the buffer is empty and whether interrupts have yet been generated since the processor has written into the buffer in combination with other limitations as recited in independent claim and further in view of the specification and applicant's arguments.

As per independent claims 4 and 8, Applicant's claimed invention is deemed allowable over the prior art of record as the prior arts, alone or combination, fail to teach or suggest a controller arranged to receive requests fro data from the connection, and to respond to the requests by sending a message containing a data item from the buffer if the buffer is not empty, or by sending a negative acknowledge signal to the connection if the buffer is empty and to send an interrupt signal to the interrupt output when the buffer is empty on receiving one of the requests, but only if no interrupt has yet been sent since data has been written into the buffer in combination with other limitations as

recited in independent claims and further in view of the specification and applicant's arguments.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
